

BAILY GARNER

BUILDING SUCCESS. DELIVERING QUALITY.

The Company

Baily Garner strives to make a positive impact on people's lives through a proven multi-disciplinary approach to construction projects. Serving both public and private sector clients, the company focuses on delivering exceptional buildings that enhance living, learning, and working environments.

With over 45 years of innovation, Baily Garner has established a significant presence in the UK. With offices in London and Birmingham, and a diverse portfolio spanning housing, healthcare, education, and more, the company is proficient in both new builds and restorations.

Dedication to continuous improvement has made the firm a leader in interdisciplinary practice, consistently enhancing services to meet clients' evolving needs.

The Challenge

Before engaging with Peer Software, Baily Garner faced data accessibility challenges due to an uncoordinated IT infrastructure between their offices.

Each location utilized separate servers which caused significant issues with data replication and access, particularly when employees needed to work remotely or travel between offices.

This resulted in lost productivity and increased operational complexity, prompting the firm to seek a robust solution like PeerGFS.

Project Profile

PEER SOFTWARE SOLUTION

- ▶ PeerGFS™

CUSTOMER PLATFORM(S)

- ▶ Microsoft Windows
